ART385  
Glitch Image Arrays  
2/20/20

Assignment:  
Have an array of images change and glitch around

Audience:  
Professor and students

Reflection:  
Learning more complicated coding topics and applying them to p5 have been very fun and interesting. My favorite part was trying new things that we may not have done in class like using sound. I'm very excited to start on the project because this has given me a clear image of what I want to do.
